

Get your AI assistants today: the ultimate guide

[Sign up Free Beta](#)

Why did we build this?

Knowlee was born from a real need – to revolutionize how we engage with AI in the financial and competitive analysis spheres.

As a founder deeply embedded between the financial and tech sectors, I yearned for an AI that could not just follow commands but anticipate needs, spot market trends, analyze competitors, and keep me ahead of the game.

This is where Knowlee steps in – it's not just an AI tool; it's your personal, autonomous assistant. Designed to offload the mundane and repetitive tasks, Knowlee adapts and learns, aiming to handle processes end-to-end. From dissecting complex data to crafting market-winning strategies, Knowlee evolves with your needs.

It's the AI assistant I always wanted: insightful, proactive, and ever-evolving. With Knowlee, you're not just staying on top of your game; you're redefining it. Dive into the future where AI doesn't just assist – it leads.

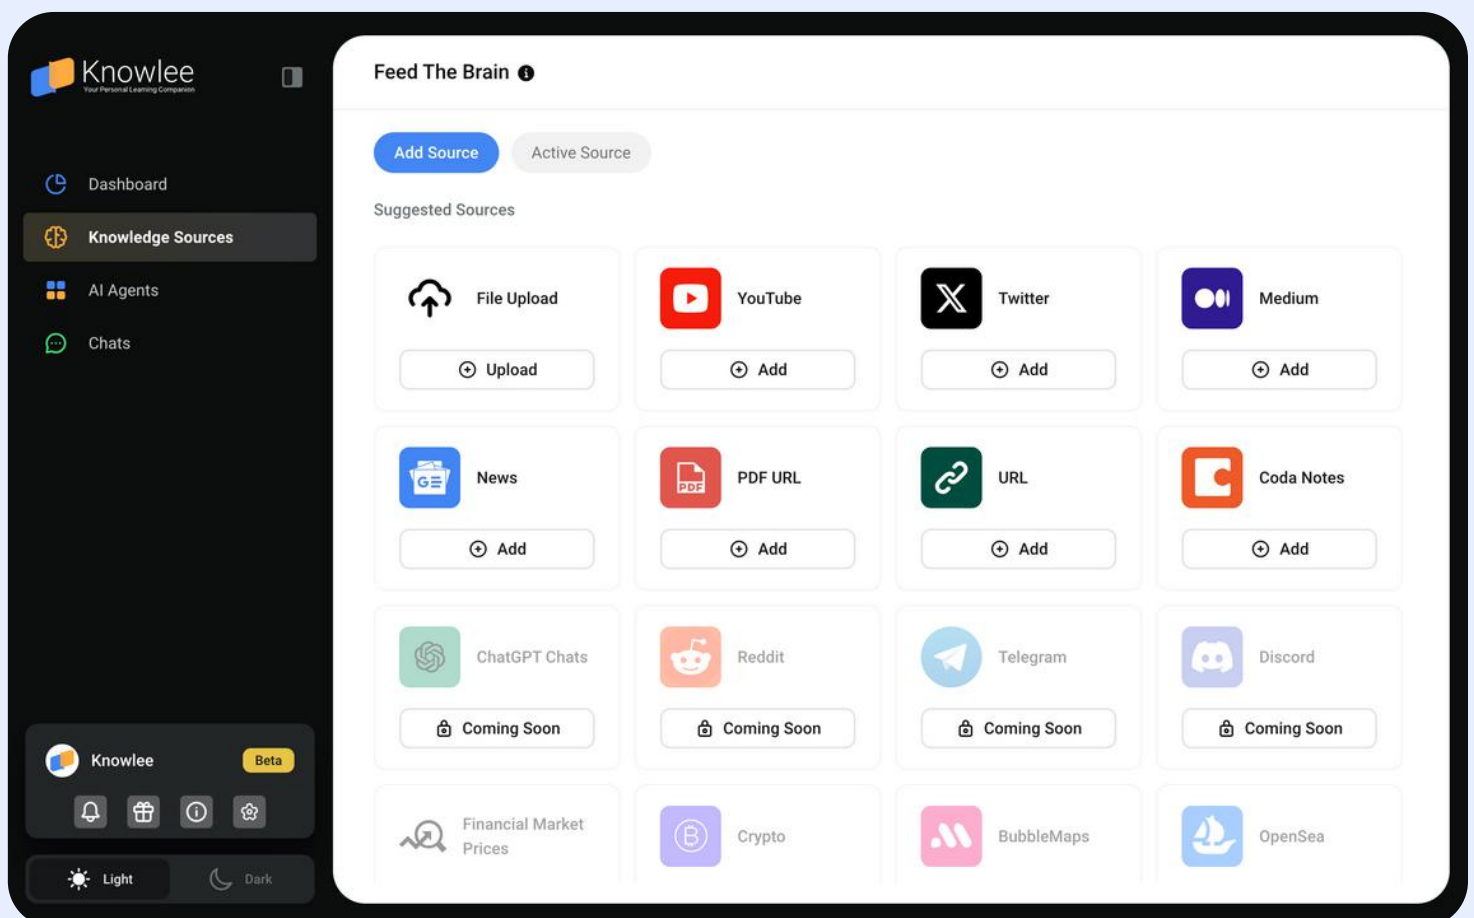

It's time to build your own.

1) Add Source

Easily add new data streams to personalize and enrich your AI's knowledge base, making it easier for you to feed and refine Knowlee with data that matters most to you

- **Suggested Sources:** Whether it's trending videos from YouTube, the latest tweets, insightful articles from Medium, or current news, Knowlee offers a broad array of pre-configured sources for instant integration.
- **File Upload:** Import your own documents, ensuring that your AI is attuned to your specific needs and projects.
- **Unlockable Sources:** As the ecosystem grows, so do your options. Stay tuned for emerging sources!

2) Create AI Assistants

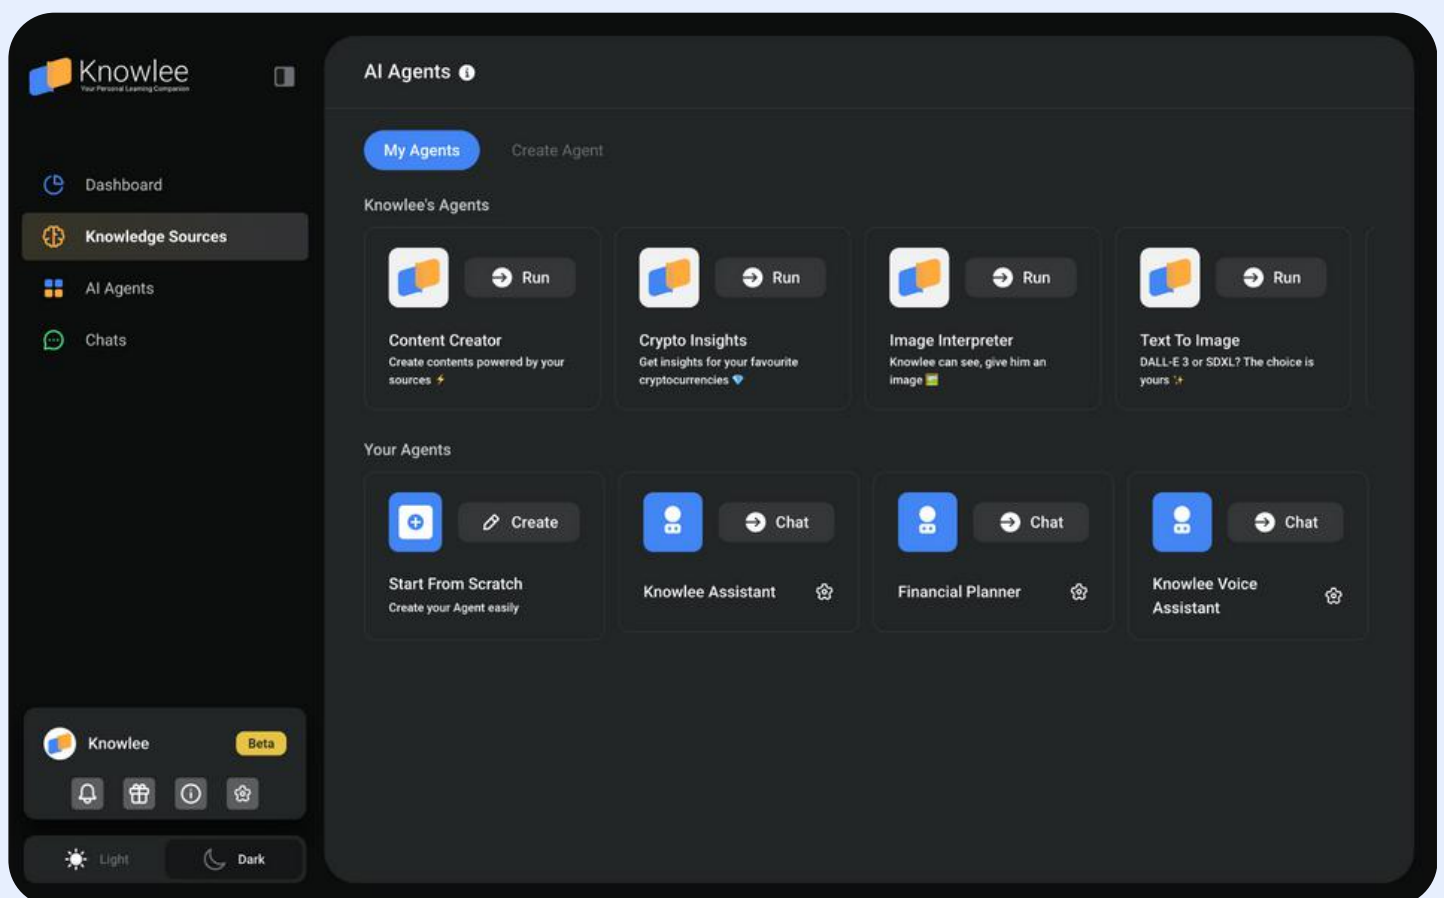

Getting Started

To begin using an AI agent:

1. Click on the 'Run' button next to a default agent to activate it.
2. To create a new agent, click on the 'Create' button under 'Your Agents' and follow the setup process.
3. Customize the agent according to your needs, and it will be ready to assist you with your tasks.

Default Agents by Knowlee Team

- Content Creator, Crypto Insights, Image Interpreter, Video Interpreter, Text to Image/Video/Audio.

2) Create AI Assistants

Create Your Own Agent

- **Start From Scratch:** Craft your own AI agent tailored to your unique needs. Here's how you can set it up:
 - **Assign a Name:** Give your agent a distinct name that reflects its purpose or the task it will perform.
 - **Custom Instructions:** Define the operations your agent should follow by providing specific instructions or guidelines.
 - **Default Questions:** Establish four default questions that your agent can answer, setting the framework for its functionality.
 - **Sources for Context:** Add relevant knowledge sources to inform your agent and enhance its contextual understanding.

The screenshot shows the Knowlee AI Agents creation interface. On the left is a sidebar with navigation links: Dashboard, Knowledge Sources, AI Agents, and Chats. The main area is titled 'AI Agents' and contains a 'Create Agent' button. Below this, there are four sections for configuring the agent: 'Name of the assistant' with a text input field; 'Instructions' with a text area; 'Initial prompts' with four text input fields labeled 'Question 1' through 'Question 4'; and 'Data Sources' with a table of links. The table has columns for a checkbox, a YouTube icon, a URL, a date, and a share icon. The first two rows are for YouTube videos, and the third row is for a Cointelegraph article.

3) Chat

Dive deeper into the world of knowledge with Knowlee's "Active Sources" section. Here, you can oversee a well-structured snapshot of the latest inputs, tailoring your AI's learning process in real-time.

- **Versatile Communication Modes:** Easily shift between different formats like Docs to Chat, Text to Image, Text to Audio, Text to Video, and Speech to Text. Experience the expansive range of AI capabilities at your fingertips.
- **Chat History:** Keep track of previous interactions effortlessly. Revisit topics, check AI outputs, or continue from where you left off.
- **Continuous Learning:** With every interaction, Knowlee evolves. The more you chat, the better it becomes at understanding and assisting you.

Content Creator

Starting with Topic Generation:

For those who have a clear vision of what they want, the "**Topic Generator**" tab is your starting point. Here, you can input prompts or keywords, giving you a more tailored set of topic suggestions. The more precise you are with your keywords, the closer the generated topics will be to your vision.

If you're looking for topics driven by current trends or your recent interactions, we have the "**Generate ideas from my active sources**" option. By selecting this, the platform will create a list of timely and relevant topics, based on the most recent entities you've interacted with.

Choosing Your Content Format:

Once you have a list of generated topics, the next step is to determine the shape they'll take. Beneath each topic, there's an option to choose the format you want the content to be in, be it a Tweet, Article, Email, or any other format we offer. Simply select the format that best suits your needs, and then click the "Submit for Generation" button.

Navigating to 'My Topics':

After your topics have been generated and chosen

Crypto market analysis: Understanding the resurgence of Bitcoin

the content generation has started and the topics are stored in the "My Topics" section. Here, you can overview all the topics you've selected and decide which one you'd like to explore further. By clicking on a specific topic in this section, it sets a filter, ensuring that when you navigate to the "Created Content" tab next, you'll see only content related to that specific topic.

The Content Generation Process:

Upon selecting a topic in the first step, Knowlee begins its magic. The content generation process starts, crafting pieces tailored to the format you previously selected. Once the generation is complete, you will see a green dot close to the ID number and a notification is sent your way, letting you know that your content is ready for review.

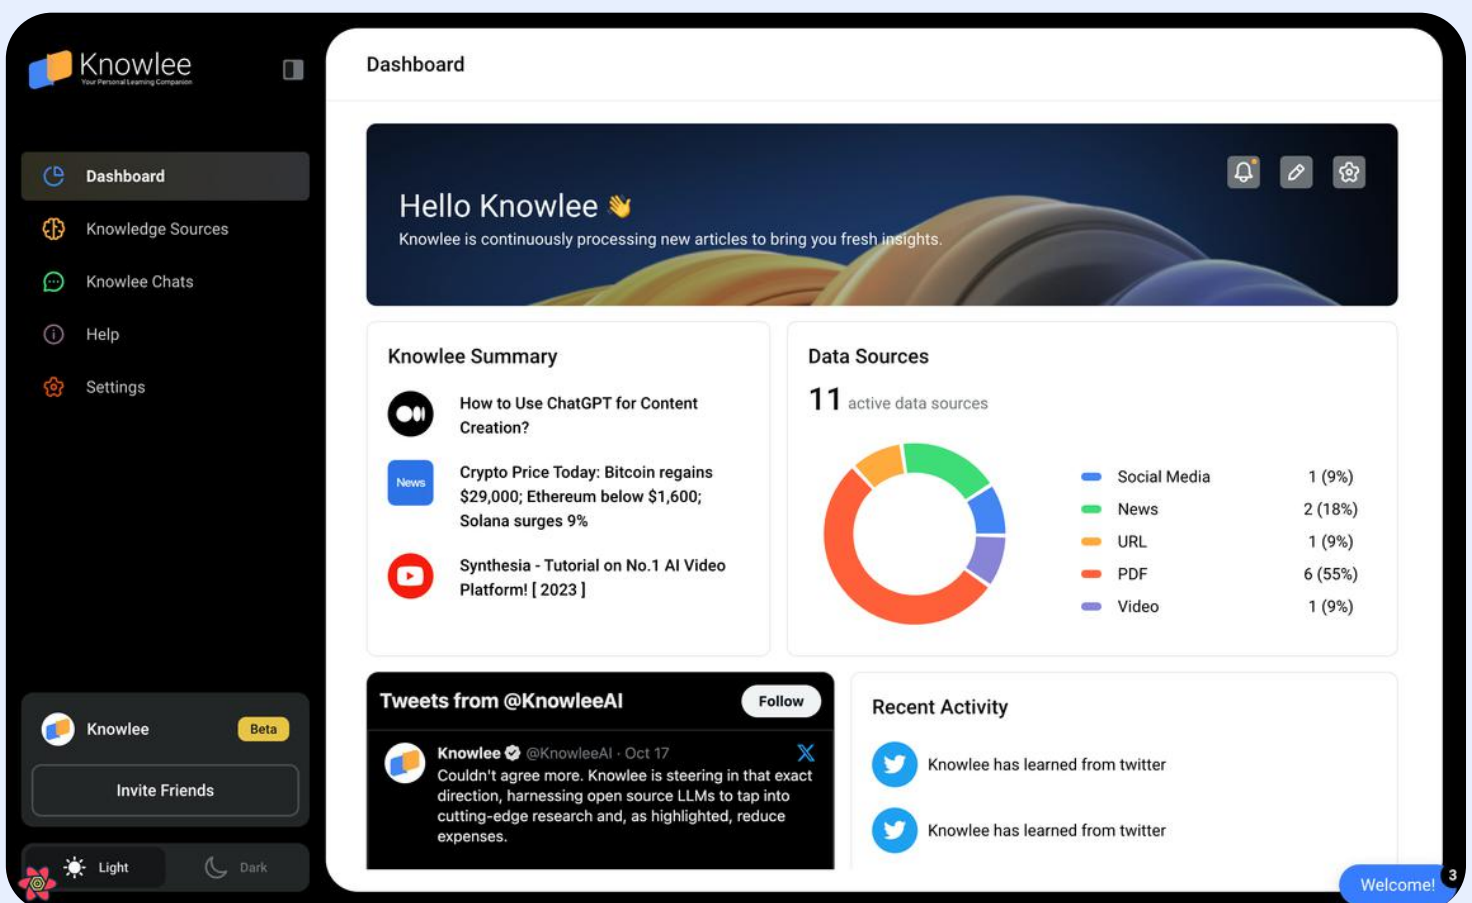

Review and Edit in 'Created Content':

In the "Created Content" tab, you'll find a compilation of all the content pieces our platform has generated for you. If you wish to view a content piece in detail or make edits, just click on it.

Dashboard

The **Dashboard** serves as the heart of the Knowlee experience, acting as your personalized command center tailored to your interests and needs. Here, you get a snapshot of recent activities, insights, and data sources, setting the stage for specialized content exploration. The "**Knowlee Summary**" provides highlights and quick links to content like AI tutorials and recent news. "**Data Sources**" offers an overview of the integrated data sources by type, while "**Tweets from @KnowleeAI**" keeps you connected with the latest Knowlee updates on Twitter. Additionally, the "**Recent Activity**" section gives you a glimpse into Knowlee's ongoing learning processes, ensuring you're always informed about its knowledge growth.

Next Milestones

● Completed Milestones:

BETA Launch (Q4 2023): Successfully launched the Knowlee BETA, initiating a robust testing phase with our users.

● Current Phase: Evaluation & Expansion (Q1 2024)

- **Ongoing Evaluation:** We are actively engaging with user feedback and performance data to refine Knowlee's features and usability.
- **Feature Development:** Based on insights gathered, we're introducing new features that align with user needs and current technological trends.
- **Community Engagement:** Continued presence on platforms like Product Hunt and social media to foster a strong community connection.

● Upcoming Objectives:

- **Enhanced Mobile Experience:** Full optimization for mobile access, ensuring a seamless user experience across all devices.
- **Financial Insights Module:** Deployment of an advanced insights module for personalized financial analysis.
- **Local LLM Integration:** Integration of a local language model to improve speed and privacy.
- **Advanced Video Editing Tools:** Introduction of Video2Video features for user-generated content creation.
- **Interactive Source Management:** Implementation of features for improved interaction with active sources.
- **Dashboard Usability Enhancements:** Addition of an 'Add Source' button for streamlined source management and grouped chat histories for easier navigation.
- **Metadata Vectors Optimization:** Continuous improvement of metadata vectors for enhanced accuracy and relevance.
- **In-App Notifications System:** Development of an automatic notification system for timely updates.
